

Ultrasound-Guided Nerve Blocks for Emergency Medicine Applications

May 4, 2018

Friday May 4, 2018		
7:30	Welcome and Continental Breakfast	
7:45	Interactive Polling Session	
8:00	Overview of Needle Guidance Basics	Andreas Dewitz, MD, RDMS, FACEP
8:20	Indications & Applications for US-Guided Nerve Blocks • Procedural Pointers • Local Anesthetic Agent Choices	
8:35	Ultrasound-Guided Nerve Blocks: Upper Extremity - Anatomic Territories - Interscalene Block - Supraclavicular Brachial Plexus Block - Axillary Plexus Block - Forearm Nerve Blocks - Cervical Plexus Block	Andreas Dewitz, MD, RDMS, FACEP
9:50	Break	
10:00	Upper Extremity Case Studies	Charlotte Derr, MD, RDMS, FACEP
10:30	Lower Extremity Nerve Blocks: Anatomy, US Characteristics, Scanning & Injection Techniques - Femoral Nerve - SFAST - Sciatic Nerve: Popliteal Blocks - Ankle Blocks: Tibial Nerve, Deep Peroneal & Sural	Andreas Dewitz, MD, RDMS, FACEP
11:30	Miscellaneous Blocks: - TAP Block - PEC I, Pec II and Serratus Anterior Blocks	Andreas Dewitz, MD, RDMS, FACEP
11:45	Lunch	
12:30	Case Studies	Charlotte Derr, MD, RDMS, FACEP
1:00	Billing and Coding	Charlotte Derr, MD, RDMS, FACEP
1:15	Interactive Post-Polling with Discussion	
1:30	Hands-On Scanning	
5:00	Adjourn	

* This is a tentative course itinerary. Lecture times/day may be subject to change
